European Securitisation, 2013 Q4

Market Environment Economic Conditions

According to Eurostat, GDP rose by 0.3% in the EU 17 area in the fourth quarter of 2013 (0.4% in the EU 28).

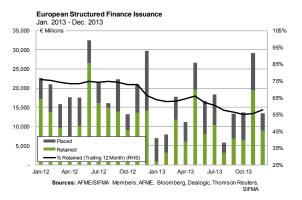

According to the January 2014 European Central Bank lending survey, banks reported a continued net tightening of lending standards in the fourth quarter. The net tightening, however, is to a much lesser degree than in prior quarters; in specific subsectors, lending standards have actually eased (small and medium-enterprises (SMEs) and for short-term loans), although standards still continue to tighten for long-term loans and large enterprises. The industry outlook was the strongest factor contributing to net tightening, as in the prior quarters, but bank competition and bank liquidity positions contributed the most to easing lending standards.

Loan demand, however, continued to fall in the fourth quarter, particularly for short-term loans and from large enterprises. Debt restructuring continues to be the key (and sole) driver of any continued loan demand, while fixed investment, debt issuance and inventories have also contributed to reductions in loan demand.

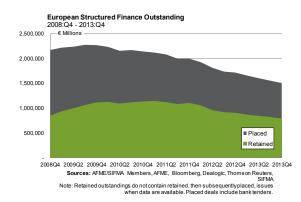

Term Issuance and Outstanding Volumes

In Q4 2013, EUR 56.3 billion of securitised product was issued in Europe, an increase of 50.5% from Q3 2013 (EUR 37.4 billion) but a decline of 11.9% from Q4 2012 (EUR 63.9 billion). Of the EUR 56.3 billion issued, EUR 21.6 billion was placed, representing 38.4%, compared to EUR 17.1 billion placed in Q3 2013 (representing 45.7%) and EUR 27.2 billion placed in Q4 2012 (representing 42.5%).

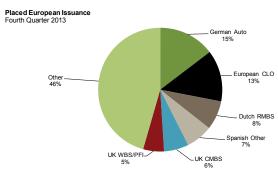

For the full year 2013, EUR 180.8 billion of securitised product was issued in Europe, of which EUR 76.4 billion was placed.

Net issuance in the fourth quarter remained negative. At the end of Q4 2013, 1.50 trillion was outstanding, of which 788.7 billion (52.5% of outstanding) was retained, presumably for repo or other secured financing. Since the peak in the third quarter of 2009, outstandings have fallen 33.8%.

German autos led placed totals (EUR 3.2 billion) in the fourth quarter followed by European CLOs (EUR 2.9 billion). A Spanish electricity tariff deal and UK CMBS deal rounded out the largest deals placed in the fourth quarter. Several deals from a wide variety of countries and collateral were placed in the fourth quarter, including Finnish auto, French credit card, Irish RMBS, and an Austrian auto deal.

Credit Quality

In Europe, the amount of negative rating migrations slowed substantially in Q4 2013 from Q3 2013. Downgrades were concentrated largely in prime RMBS and CMBS deals, but the number of rating migrations halved in 2013 from 2012.

ABCP Trends

According to Dealogic data, European ABCP issuance in Q4 2013 was EUR 38.1 billion, a decline of 29.6% and 29.2%, respectively, quarter-over-quarter and year-over-year. Multiseller conduits dominate as the largest category of issuer in the ABCP market. European ABCP outstandings remained little changed from the prior quarter, ending the fourth quarter at EUR 14.8 billion, up slightly from EUR 14.6 billion in Q3 2013.

Major Regulatory, Legislative and Policy Initiatives

The Bank of England's Funding for Lending Scheme was extended in April 2013 to January 2015, one year beyond its original expiration date. In addition, the scheme was expanded to encourage lending to SMEs as well as financial leasing and factoring corporations.

¹ Retained debt does not include bank debt tenders, which are counted as part of placed.

MARKET HIGHLIGHTS AND COMMENTARY

ESMA has published a Consultation Paper on CRA 3 implementation including in particular the new disclosure rules required under Article 8(b). Responses are due by 11 April 2014. A public hearing in relation to the implementation of CRA 3 took place on 14 March in Paris.

Under the Capital Requirements Regulation ("CRR") attention has now moved to Level 2 implementation in which the EBA has been asked to prepare various reports relating to liquidity and calibration by the end of this year.

Solvency 2: AFME continues to engage with the Commission and EIOPA to provide data and analysis to support the calibration of appropriate capital charges for securitisation in Solvency 2.

Shadow Banking: AFME continues to engage with the Financial Stability Board regarding regulation of the shadow banking system. The European Commission has also announced that it will publish various proposals in this regard in early September.

Basel RWA for ABS: further to our submission in March 2013 AFME continues to engage with the Basel Committee on Banking Supervision ("BCBS") as well as national and regional regulators. The responses to BCBS are due on 21 March 2014.

The European Commission published its Final RTS or risk retention and due diligence rules for European bank investors in securitisation.

In December 2013 the European Banking Authority published its consultation paper on Significant Credit Risk Transfer relating to Article 243 and Article 244 of Regulation 575/2013. This Consultation Paper is setting out draft Guidelines in relation to determining whether there has "Significant Risk Transfer" ("SRT") as defined in the CRR. The AFME response to the Consultation Paper was filled on 17 March 2014.

The European Parliament has decided to postpone the vote on the proposed Money Market Funds Regulation until the next Parliament. Consequently, the next Parliament could potentially revisit the securitisation wording.

Source: Fitch Ratings, Moody's Investors Service, Standard & Poor's

¹ Each box contains two numbers: Upgrades followed by Downgrades. Because the three credit rating agencies track different securities and apply slightly different rating criteria, these numbers are 2 Fitch's "Multinational" dassification includes cross-jurisdictional CMBS issues as well as the aggregated sum of rating actions in other EMEA countries, namely Austria, Belgium, Greece, Ireland, Portugal, and the Russian Federation. Fitch assigns CDO issues to the country in which the majority of the underlying assets are located.

3 "Multinational" for Standard & Poor's and Moody's ratings is defined as all issues with collateral located in multiple countries. All CDOs are also included in this category.

¹ Markit provides independent composite spread levels which are calculated from dealer contributions and are subject to multiple cleaning algorithms. These levels are equivalent to the 'discount margin' which is defined as the effective spread to maturity of a floating rate security after discounting the yield value of a price other than par over the life of a security.
² US CMBS spreads are quoted for fixed rate bonds as the spread to the yield on US Treasury Bonds with the same average life as the CMBS bond.

¹ Markit prices: Independent composite prices levels are calculated from dealer contributions which have been subject to multiple cleaning algorithms for one sample bond per sector and ratings category where possible. According to the rules we have agreed on previously, the security we have chosen receives the greatest number of contributions for a bond matching the criteria and must receive at least 3 individual contributions. We have included data from the start of 2007 to present.
² A composite level of prices for Germany 3-5 year AAA RMBS could not be formed after 7 July 2008.

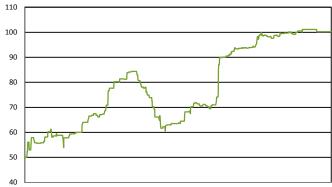

CMBS AND ABS PRICES

8.1. Pan-European 3-5 Yr AAA CMBS Prices¹

Pan-European AAA CMBS provided: Opera Finance (Metrocentre) Plc, Class A, Series 1. ISIN#XS0211548143. GBP-denominated.

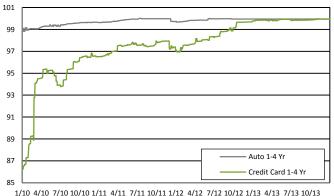

8.2. Pan-European 3-5 Yr BBB CMBS Prices¹

1/10 4/10 7/10 10/10 1/11 4/11 7/11 10/11 1/12 4/12 7/12 10/12 1/13 4/13 7/13 10/13

Pan-European BBB CMBS provided: German Residential Asset Note Distributor Plc, Class D, Series 1. ISIN# XS0260143101. EUR-denominated.

8.3. Pan-European 1-4 Yr AAA ABS Prices¹

- Pan-European AAA Auto ABS provided: Driver Three GmbH, Class A, Series 3. ISIN# XS0270108573. EUR-denominated.
- Pan-European AAA Credit Card ABS provided: Chester Asset Receivables DGS 2004-1, Class A, Series UK2004-1. ISIN# XS0188611783. GBP-denominated.

8.4. Pan-European 1-4 Yr BBB ABS Prices¹

1/10 4/10 7/10 10/10 1/11 4/11 7/11 10/11 1/12 4/12 7/12 10/12 1/13 4/13 7/13 10/13

 Pan-European BBB Credit Card ABS provided: Chester Asset Receivables DGS 2004-1, Class C, Series UK2004-1. ISIN# XS0188612245. GBP-denominated.

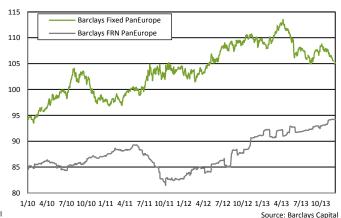

Note: Pan-European 1-4 Yr BBB Auto ABS price data are not available.

¹ Markit prices: Independent composite price levels are calculated from dealer contributions which have been subjected to multiple cleaning algorithms for one sample bond per sector and ratings category where possible. According to the rules we have agreed on previously, the security we have chosen receives the greatest number of contributions for a bond matching the criteria and must receive at least 3 individual contributions. We have included data from start of 2007 to present.

9.1. Securitised Index Option Adjusted Spreads Prices

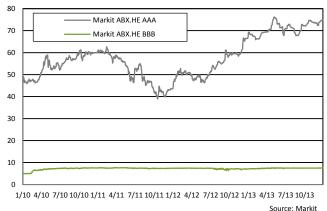

9.2. Barclays PanEurope Fixed and Floating

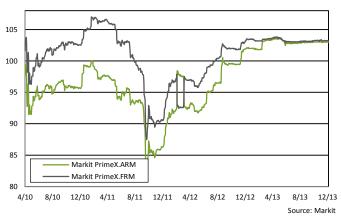

9.3. ABX.HE and CMBX Prices¹

9.4. PrimeX ARM and FRM Prices

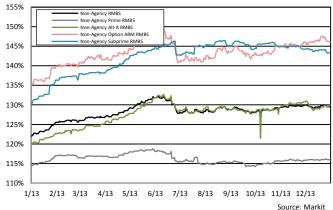

9.5. CMBX 6 AAA Prices

9.6. iBoxx US RMBS Prices

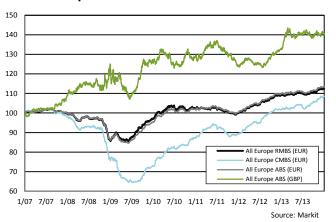

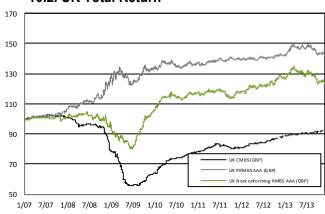

¹ Due to pricing convention changes occurring on 20 April 2009, ABX.HE and CMBS spreads are no longer available.

TOTAL RETURN DATA

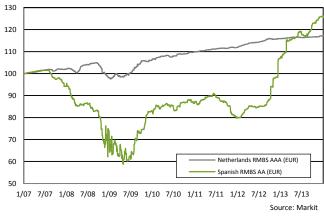

10.1. European Total Return¹

10.2. UK Total Return¹

10.3. Europe ex UK RMBS AAA1

¹Total Return Data may be denominated in either EUR or GBP depending on the index. See legends for more detail.

¹ US and Asian volumes were converted to euro based on the average exchange rate of the currency of issue to euro over each given quarter. Historical or prior period numbers are revised to reflect changes in classification, refined selection methodology, or information submitted to our data source after the prior period cut-off dates.

²Global securitisation issuance includes ABS & MBS, both public and private placements, but excludes any retained volumes. Asia numbers include Japan.

³Global corporate bond issuance is for investment grade bonds, public placements only. Asia numbers include Japan.

⁴Global government bond issuance includes all agency and non agency issuances and does not include supranationals. Asia numbers include Japan.

Summary of the Methodologies Adopted for this Report

1. Issuance

1.1. – 1.2. European and US Historical Issuance

The tables covering historical issuance in Europe and the US are denominated in EUR billions. The historical issuance volume total is calculated by adding all transactions in different asset classes including, among others, asset-backed securities (ABS), collateralised debt obligations (CDOs), commercial mortgage-backed securities (CMBS), and residential mortgage-back securities (RMBS). Please note that numbers may not add due to independent rounding and that historical or prior period numbers are revised to reflect changes in classification, refined selection methodology, or information submitted to our data sources after the prior period cut-off dates.

1.3. -1.4. Issuance by Collateral

The European issuance volumes are determined based on the review of several data sources: Bloomberg, JP Morgan, Thomson Reuters, and UniCredit starting from Q1 2009; and Deutsche Bank starting from Q1 2010; Citigroup from Q2 2010; and Dealogic from Q1 2011. In prior quarters our sources were Bloomberg, JP Morgan, Merrill Lynch, RBS, and Thomson Reuters. RMBS, CMBS and ABS are defined as European by having underlying assets located in a European country. European securities included in the calculation are the ones for which there is a specific match in terms of size, name, country of collateral and collateral type from at least two sources. Securities that fail to meet these criteria are excluded. With respect to CDOs, securities are designated as European if they are issued in any European currency, regardless of their country of collateral.

Placed and retained European issuance collateral are sourced from AFME and/or SIFMA dealer member research, Dealogic, Bloomberg, and Thomson Reuters. Placed issuance includes all tranches placed in the public market, private placements, and preplacements. Partial issuance of a tranche is considered to be placed if half or more by euro amount of the tranche is reported placed. Placed and retained issuance will not retroactively consider securities originally issued retained and then placed in the marketplace, and are estimates.

The US non-agency RMBS, CMBS, ABS and CDO issuance data source is Thomson Reuters. From 2008 onward, Dealogic replaced Thomson Reuters as the source of US non-agency CMBS issuance. Agency mortgage-backed securities (MBS) are defined as securities issued by Fannie Mae, Freddie Mac, and Ginnie Mae and are acquired from company statements. US issuance data are generally based on the sum of securities with US collateral; agency issuance numbers do not include securitisations of existing agency securities. US CDO data are defined as USD-denominated CDOs regardless of the country of collateral. The US issuance data are converted to Euros based on the

USD to EUR exchange rate at each quarter-end indicated below.

Q1 2011	.7064
Q2 2011	.6896
Q3 2011	.7468
Q4 2011	.7714
Q1 2012	.7495
Q2 2012	.7899
Q3 2012	.7777
Q4 2012	.7580
Q1 2013	.7802
Q2 2013	.7687
Q3 2013	.7393
Q4 2013	.7277

These same conversion rates, sourced from Bloomberg, are used on all US issuance and outstanding volume data.

1.5. Issuance by Country of Collateral

The tables covering issuance in the US and Europe are presented in EUR billions. For Europe the information is segmented by country of collateral.

The European issuance is segmented by country to the extent that a determination can be made. Securities with the underlying collateral originating from more than one jurisdiction are categorised as Multinational. Almost all CDOs are classified under this Multinational group due to the complexity involved in identifying origin of collateral for each specific tranche. The European issuance volumes are determined based on the review of multiple data sources: Deutsche Bank and Bank of America-Merrill Lynch as of Q1 2010, Bloomberg, JP Morgan, Thomson Reuters and UniCredit starting from Q1 2009; and RBS starting from Q3 2009. In prior quarters the sources were Bloomberg, JP Morgan, Thomson Reuters and Merrill Lynch.

US CDO data are defined as USD-denominated issues regardless of country of collateral.

1.6. Issuance by Collateral Type and Country of Collateral

Issuance information is further specified by country of collateral for European issuance only and by asset class. CDO classification is the same as above.

1.7. – 1.8. Issuance by Rating

Issuance is presented by credit rating classification (AAA; AA; A; BBB and below; and Not Rated) on a quarterly basis for 2007 and 2008. The credit rating assigned is the lowest of the ratings provided by Fitch Ratings, Moody's Investors Service and/or Standard & Poor's. These ratings are intended to represent their corresponding equivalent at each agency; e.g., an AAA rating is equal to an Aaa Moody's rating, AA equal to Aa1, etc. Securities are classified 'Not Rated' if none of the credit rating agencies have provided an opinion on the underlying credit quality of a particular tranche, or if the ratings are unknown. US agency

MBS issues are generally not rated and therefore grouped separately under Agency MBS.

1.9. Issuance by Deal Size

European and US securitisation issuance volume is segmented by transaction size based on data provided by Dealogic. The European data covers all asset classes and EUR-denominated CDOs. US non-Agency data includes ABS, non-agency CMBS and RMBS, and USD-denominated CDOs. US agency MBS, which includes agency CMBS and RMBS, is shown separately.

All data, except for CDOs, are included according to the country of collateral. The number of issues refers to the number of deals, not the number of tranches within each deal.

Dealogic data for retained deals are based on available information from both European and US dealers' syndicate desks. Further statistics on retained deals are added based on intelligence from other market participants such as regulatory bodies and newswires across Europe.

2. Balances Outstanding2.1. – 2.2. Outstandings by Collateral

The outstanding volumes are reported by asset class. Subtotals may not add to totals due to independent rounding and historical or prior period numbers are continuously revised to reflect changes in classification, refined selection methodology, or information submitted to our data sources after the prior period cut-off dates. For Europe, balances outstanding are calculated by the principal balance outstanding on structured product transactions including public, private, rated, unrated, listed and unlisted securities provided by Bloomberg. Balances outstanding are determined by multiplying eligible securities by their pool factor for the quarter and sorted accordingly. Tranches that are non-EUR-denominated are converted to EUR by Bloomberg based on the exchange rate at the time of the pricing date (as specified by the lead manager/arranger), or, if missing, the issue date as specified in each security's original offering documentation. Securities included in the calculations, except for CDOs, have collateral originated from at least one European country to the extent that a determination can be made. However, for ABS and MBS securities with collateral originated in multiple countries, or where the origin of the underlying collateral is undefined, the following selection criteria apply: securities are considered eligible as European only if they are denominated in a European currency, as defined below, and the country of issuer (considered to be the country in which the issuing SPV is incorporated) is within Europe. In certain limited cases, the Channel Islands and the Cayman Islands are considered eligible as European jurisdictions for ABS and MBS products if underlying collateral is derived from a variety of jurisdictions and the original currency of issue is EUR only.

For our selection criteria, European currencies include the euro (EUR) and all predecessor currencies, as well as the Turkish lira (TRY), the Danish kroner (DKK), the Swedish krona (SEK), the Swiss franc (CHF), the Polish zloty (PLN), the British pound (GBP), and the Russian ruble (RUB).

Furthermore, our selection criteria consider Europe to include all European Economic Area (EEA) countries and certain non-EEA countries located on the geographic European continent. We have included Turkey, Kazakhstan, Iceland, Georgia and the Russian Federation in these criteria.

For the CDO sector, only issuance denominated in a European currency (as specified above) isincluded, regardless of the country of collateral.

Beginning in Q2 2010, the CDO asset class has been further broken down into the CDO and SME asset classes. SME securities follow the same criteria application as non-CDOs. Revisions during this quarter were retroactively applied and balances outstanding from prior quarters have all been restated accordingly.

The US outstanding calculations are based on information derived from Bloomberg for ABS, non-agency RMBS, and non-agency CMBS; agency balance statements for agency MBS. The following asset classes are segmented: agency MBS, non-agency RMBS, non-agency CMBS, and ABS. The agency MBS figures include both agency RMBS and agency CMBS (i.e., multifamily). The ABS classification for the US includes CDOs, which contains USD-denominated CDOs regardless of the country of collateral. As of 2013 Q4 the ABS subclass Home Equity has been moved to non-agency RMBS and outstandings reflect the change.

2.3. Outstandings by Country of Collateral

The European outstanding volumes are segmented by country of collateral based on the above methodology. For our selection criteria, Europe is considered to include all European Economic Area (EEA) countries and certain non-EEA countries located on the geographic European continent (Georgia, Iceland, Turkey, Kazakhstan and the Russian Federation). In certain limited cases, the Channel Islands and the Cayman islands are considered eligible for ABS and MBS products if underlying collateral is derived from a variety of jurisdictions and the original currency of issue is European. CDOs issued in a European currency with either collateral from multiple jurisdictions or for which the underlying location of collateral is undefined are categorized under 'Multinational' for the purpose of determining outstanding balances by country. Collateral from multiple European countries is now categorised under 'PanEurope' unless collateral is predominantly (over 90%) from one coun-

The US outstandings include both agency and non-agency securities.

2.4. – 2.5. Outstandings by Moody's Rating

The percentage rating distribution for Europe and the US is based on Moody's Investors Service data for balances outstanding. The data provides current ratings as of the end of the quarter. The data presented are based on original issuance volumes for European and US securities, and therefore do not reflect amortised balances. Information on current ratings by outstanding volumes is not currently available. Moody's data have been converted to percentages based on the original issuance size to make it easily compa-

rable with the outstanding volumes provided in this report. Defaulted and unrated issues are excluded from these data.

2.6. Outstandings by Country and Collateral

Outstanding volumes are further specified by asset class and, for Europe only, by country of collateral. CDO selection criteria are the same as above.

2.7. Outstandings by Vintage

Outstanding volumes by vintage are determined by year of original pricing date. Restructurings are counted from original pricing date rather than remarketed date.

3. Credit Quality – Rating Changes3.1. – 3.4. Upgrades/Downgrades by Country

These tables present the aggregate number of upgrades and downgrades for securitisation (including CDOs) by country of collateral for European deals and in total for US deals. The information is based on data provided by DBRS, Fitch Ratings, Moody's Investors Service and Standard & Poor's. The upgrade number is shown first followed by the downgrade number. The upgrades and downgrades of each of credit rating agency is shown in separate tables and presented as the number of rating changes. Because the credit rating agencies track different securities and apply different credit rating methodologies, these numbers are not directly comparable.

According to Moody's Investors Service, a security is classified as European or American based on if it is monitored out of Moody's office in Europe or the US. More specifically, European securities are classified within a particular country if all of its assets are located within that country.

The Multinational category includes CDOs and all other cross-jurisdictional securitisations for both Moody's Investors Service and Standard & Poor's. The Fitch Ratings Multinational classification includes cross-jurisdictional CMBS as well as the aggregated sum of rating actions in other countries including Austria, Belgium, Greece, Ireland, Portugal and the Russian Federation. Fitch Ratings assigns CDO issues to the country in which the majority of the underlying assets are located.

3.5. – 3.12. Upgrades/Downgrades by Collateral

These tables present aggregate upgrades and downgrades for securitisation and CDO issues by securitised product type for Europe and the US. The upgrade number is shown first followed by the downgrade number. The upgrades and downgrades of each agency are shown in separate tables and presented by number rating changes. For Fitch Ratings, the category Other RMBS includes other categories of RMBS transactions such as ALT-A, reverse mortgage, government RMBS, etc. The category 'Other ABS' may include student loans and the whole business securitisations (WBS). For Moody's Investors Service and Standard & Poor's, the total number of European upgrades/downgrades reported by collateral type are not always comparable with the upgrades/downgrades presented by country because there may be securities that experience rating migrations that are backed by collateral originated from a country outside of those specified and will not be captured under the "Multinational" category.

4 - 6 Spreads

4.1. - 4.4. CMBS Spreads

These graphs present credit spread data for European and US AAA and BBB 3-5 Yr CMBS. European 3-5 year AAA & BBB CMBS data are provided by Markit. Composite spread levels are calculated from dealer contributions which have been subjected to multiple cleaning algorithms. Spread levels are equivalent to the discount margin. The discount margin is defined as the effective spread to maturity of a floating rate security after discounting the yield value of a price other than par over the life of the security. The spread calculation is based on data provided by dealer trading desks.

US CMBS 3 and 5 year spreads are provided by Trepp LLC. US CMBS spreads are quoted as fixed rate bonds based on the yield of US treasury bonds with the same average life.

5.1. - 5.5. RMBS Spreads

European RMBS credit spreads are provided for 3-5 year AAA and BBB securities based on data provided by Markit. European credit spreads cover Spain, Netherlands, Italy, Germany and France. The UK RMBS spreads are provided for both prime and non-conforming transactions. Markit spread calculations are based on data provided by dealer trading desks.

US subprime AAA home equity credit spreads are calculated over LIBOR and provided by Barclays Capital.

6.1. - 6.4. ABS Spreads

European ABS credit spreads are provided for 1-4 year AAA and BBB securities based on data provided by Markit based on the same calculations described above.

US spreads reflect levels for AAA autos, AAA credit cards, and BBB credit cards; spreads are fixed against swaps and are provided by JP Morgan.

7 - 8 Prices

7.1. - 7.4. RMBS Prices

These graphs represent price data for specific European and UK RMBS selected as benchmarks in the respective jurisdictions. The price calculations are provided by Markit and are based on data provided by dealer trading desks.

8.1. - 8.4. CMBS and ABS Prices

These graphs represent price data for specific pan-European CMBS and ABS selected as benchmarks in the respective jurisdictions. The price calculations provided by Markit and are based on data provided by dealer trading desks.

9.1. - 9.6. Indices Data

The first graph presents daily option-adjusted spreads provided by Barclays Capital for Europe from a cross-section of securitised products. The second graph presents prices provided by Barclays for a cross-section of pan-European securitised products, broken out by fixed and floating rates.

The third, fourth and fifth graphs present daily prices provided by Markit for the AAA- and BBB-rated US ABX.HE indices, the AAA-rated PrimeX.ARM and PrimeX FRM indices, and the AAA-rated CMBS index.

The ABX, CMBX, and PrimeX indices are a set of reference obligations issued by twenty issuers of RMBS or CMBS that meet the criteria specified in the ABX.HE, CMBX, or PrimeX index rules. The three sets of indices are benchmarks in the securitised marketplace for US subprime RMBS, post-crisis CMBS, and prime non-agency RMBS respectively.

Price and spreads for the ABX, CMBX, PrimeX, and indices are contributed from various dealers in the industry and are cleaned according to Markit's proprietary algorithms.

The fifth graph present daily prices of iBoxx non-agency RMBS, provided by Markit for the US non-agency RMBS sector. Data are sourced from pre-crisis vintages (2005-2007), and are further broken down to the prime, subprime, Alt-A, and option ARM categories.

10 Total Return Benchmark Data 10.1. – 10.3. Total Return Data

These graphs represent historical return composites generated by tracking the aggregate asset value on an underlying portfolio of single name bonds. Data are provided by Markit and are preliminary.

11. Asset-Backed Commercial Paper (ABCP)

11.1. – 11.2. ABCP Historical Issuance; ABCP Issuance by Nationality of Issuer

Aggregate issuance data covers the period 2008 through 2009 for Europe and the US. European issuance is provided by Dealogic, which identifies the issuer's nationality as the country in which the SPV is domiciled. These data do not represent the seller-servicers of the underlying assets or the bank conduits for the ABCP deals. The US data are provided by Moody's Investors Service. The volumes are converted from dollar to euro based on the end-of-quarter exchange rate.

11.3. European ABCP Issuance by Programme Type

ABCP data by programme type is provided by Dealogic and covers the period from 2008 through 2009 for Europe. The programme type classifications included are: SIVs, single-seller conduit, multi-seller conduit and 'unspecified'.

11.4. ABCP Outstandings by Nationality of Issuer

Outstanding quarterly data are provided from the first quarter of 2008 through 2009 for Europe and the US. The European outstanding is provided by country through the Dealogic database, and the US data are provided by Moody's Investors Service. Dealogic identifies the issuer's nationality as the country in which the SPV is domiciled. The dollar

volumes were converted to euro based on the end-ofquarter exchange rate.

11.5. – 11.6. ABCP Outstandings by Programme Type

Outstanding quarterly data are provided from the first quarter of 2008 through 2009 for Europe and the US. The European data are provided by Dealogic and the US data are provided by Moody's Investor Service. The volumes are converted from dollars to euro based on the end-of-quarter exchange rate. The programme type classifications included are: loan-backed, SIVs, single-seller conduit, multi-seller conduit and 'unspecified'.

11.7. ABCP Outstanding Assets Split by Country

Global outstanding ABCP assets percentages are presented by country as of June 2008. The information is provided by Moody's Investors Service. The asset percentage represents the actual amount of assets funded via ABCP and other sources, not including cash and short-term investments. Therefore the asset percentage is not necessarily equal to the ABCP outstanding amount.

11.8. ABCP Spreads

The US ABCP spread information is based on data collected and developed by the Federal Reserve. The spread is defined as the difference between AA ABCP and AA nonfinancial CP.

12. Global Comparative Data 12.1. - 12.3. Global Securitisation Issuance, Global Corporate Bond Issuance, Global Government Bond Issuance

These statistics are provided by Dealogic and present issuance volumes for securitisation, corporate bonds and government bonds in Asia, the US and Europe. Securitisation and government bond figures represent gross issuance; corporate bond issuance is provided on a gross, not net, basis. All types of securitisation are included; CDOs are included based on the region of the currency in which they are denominated. The issuance volumes are provided quarterly for 2007 and 2008. These statistics do not correspond to the issuance numbers provided elsewhere in this report as different sources and selection methodologies are used to determine both the European and US securitisation issuance. In terms of geographical description, Europe represents the European, the Middle East and African (EMEA) countries while Asia includes the Pacific countries and Japan.
