SIFMA Cybersecurity Government Representatives Committee Committee Overview

2017

Overview

SIFMA is actively engaged in coordinating the effort to improve our sector's collective cybersecurity capabilities. SIFMA is continually working with industry and government leaders to identify and communicate cybersecurity best practices for firms of all sizes and capabilities and educate the industry as to the evolving threats and appropriate responses. This work extends to Congress as well.

Committee Remit

The Cybersecurity Government Representatives Committee serves as a forum for firms to discuss SIFMA's work on cybersecurity and to develop advocacy plans for moving the government and Congress forward. Developments in the legislative and regulatory spheres are presented to the committee and potential advocacy strategy is determined.

Key Priorities & Issues

- Information Sharing Legislation
- Insider Threats
- Cyber Insurance
- Third Party Risk Management
