DASH
FINANCIAL TECHNOLOGIES

demystify the trade

Dash's mission is to empower the Institutional trading community with tailored technology solutions, built with integrity, innovation, and craftsmanship.

execution services

An elite range of execution solutions calibrated for performance and flexible to optimize for liquidity, costs and everything between.

SENSOR™ SUITE
(equities/options advanced routing)
Sensor is Dash's signature multi-asset router designed to accommodate extreme liquidity capture while allowing an Institutional user to optimize execution costs, providing a highly customizable execution solution for any strategy, preference or workflow. The Sensor suite includes Dash's proprietary Algo Wizard, a unique interface allowing the customization of a universe of algorithmic parameters providing a tailored experience for every order.

EQUITY ALGORITHMS
Featuring a range of tools to electronically execute orders with a range objectives, time horizons and performance benchmarks. Under each algorithm sits Sensor to maximize the performance of each and every algorithmic child execution.

IMPLEMENTATION SHORTFALL	CLOSE
FLEXIBLE PARTICIPATION	RAPID
VOLUME PARTICIPATION	DARK
SYNTHETIC PEG	TWAP
PHANTOM	VWAP

OPTIONS / HANDS ON
Dash combines significant extensive relationships with the most relevant liquidity providers and Dash's industry-leading technology, analytics, and reporting, to deliver an exceptional high-touch execution experience.

Our accomplished and highly experienced team provides a range of liquidity, workflow and performance solutions for Institutional options orders that require oversight, expertise, and finesse.

analytics & visualization

Real-time, broker-neutral, order-to-execution transparency available in various formats, featuring a first of its kind order visualizer to provide straightforward comprehension of how orders behave in real-time.

DASH360
One of our core tenets is transparency. Dash provides all aspects of the order lifecycle, including routing information, execution detail, order-book detail at every step, venue analysis, exchange reconciliation, and performance. Regardless of your EMS or OMS, our secure web-based portal, Dash360, delivers infinite transparency in real-time with first-of-its-kind data visualization.

DROP360
Drop360 is an enhanced, real-time drop-copy facility delivering instantaneous transparency into the complete order routing behavior, execution behavior, costs and performance in a machine readable format utilizing FIX protocol. Building on the depth of content available in Dash360, Drop360 provides a seamless, machine-readable delivery of this content allowing the user to consume the data for proprietary reporting, calculation, and storage.

CUSTOM REPORTING
Dash maintains a rich data set and is happy to provide bespoke reports and analysis on request.

workflow technologies

A set of workflow solutions providing performance tools designed to simplify and optimize the trading process from order entry to clearing.

BLAZE™
A nimble, customizable and logical order management solution designed with simplicity and user flexibility in mind. Blaze API provides a programmable interface delivering market data, algorithmic, router and DMA access.

BROKERPOINT™
BrokerPoint is Dash's proprietary, high-speed routing network with access to a comprehensive network of brokers on the floor of the exchanges and the Inter-Dealer community (IDBs). BrokerPoint provides the ability to seamlessly and electronically manage broker activity, saving significant time on order entry/management, while maintaining rigid compliance and reporting requirements.

regulatory technologies

Through our affiliate company Dash Regulatory Technologies, we introduce an enterprise-wide solution to manage risk with innovative software solutions, to satisfy the complex reporting requirements surrounding regulatory capital compliance.
