

# **ONE ARCHIVING PLATFORM** FOR ALL YOUR COMMUNICATIONS

## Over 20,000 companies trust Smarsh with their most valuable data.

### A next generation solution for all your electronic communications.

The Archiving Platform by Smarsh is a leading, cloud-based, comprehensive archiving platform supporting a broad range of content types, including: email, instant and text messages, web, video and social media. Core features include immutable retention of all archived content in an indexed and search-ready state, policies, cases and admin/reporting functions. Key capabilities include policy-driven message supervision/review for compliance and powerful search/case management for discovery events.

### Fast and powerful search.

Built atop the same enterprise-grade technology that powers websites like E\*Trade, the platform scales to support businesses of all sizes. Search universally across people, keywords and content types to quickly return the results you're looking for. Cast a wide net or get granular—we make it easy to find the right information fast.

### Add on modules to add on value.

Extend and enhance core platform features with the addition of the Supervision, Discovery or Personal Archive modules. Supervision adds powerful message review queue functionality, team-based workflows and dashboards to core compliance capabilities. Discovery adds advanced/faceted search and the ability to place case-specific content on legal hold to core case management capabilities. Personal Archive gives employees secure and flexible access to their own archived content with our powerful search features from any device, including mobile ones, and without IT intervention.

### Social conversations as they're meant to be viewed.

Conversations are rendered contextually and identified clearly, so you'll know immediately whether you're reviewing a social media post, email, text message or other content type.

## WE ARCHIVE EVERYTHING

### Contact an account executive to learn more about The Archiving Platform or visit www.smarsh.com

"Smarsh was the choice that linked with our strategic goals and will evolve with our needs. With Smarsh, we can deploy intelligent supervision and have deeper oversight on potential infractions."

Senior Vice President, Securities America
