

Trading Floor of the **Future**

Veritone delivers actionable intelligence *as it happens* so traders have key information ahead of their competition

Proactive Audio and Video Monitoring

Index conversations continuously and automate monitoring of keywords, phrases, faces and objects within financial radio, TV and podcast outlets.

Automatic Notification of Risk Behavior

Create Watchlists that immediately notify your compliance teams when high-risk events occur.

Monitor Audio and Video Feeds

Veritone sends alerts to traders so they need not monitor financial channels all day.

Only 30% of the world's traders speak English

With Veritone, trades, for example, based in London can make trades with their counterparts in China with near real time audio and text translation.

Receive notifications for specific financial terminology mentions spoken on television, radio, podcasts and other broadcasting mediums
