Reg. SCI - Overview

- Reg SCI testing will be held on October 14, in parallel with the SIFMA industry test, and will cover Equities, Options, and Clearance and Settlement.

- The 2023 Regulation SCI BC/DR test is designed to verify that Regulation SCI entities are able to demonstrate that they can support the maintenance of fair and orderly markets in the event the Regulation SCI entities’ business continuity and disaster recovery plans are activated.

- The 2023 Reg SCI test is not an end-to-end industry integrated test; it is a test for each individual SCI Entity to test its own BC/DR environments.

- Reg SCI entities will identify designated testers from among their participant firms who will be required to take part in Reg SCI testing with them.

- The 2023 Regulation SCI test is distinct from the classic SIFMA Industry test.

- While Reg SCI test will cover a range of simulated market activities as mandated by regulation, the SIFMA industry test will retain the scope and format of prior years. Test entities determine their own test scope, ranging from simulated activity to custom test programs to bilateral connectivity testing.
SIFMA is working with Reg SCI test entities to develop a common framework for testing, including test timeline, test symbols and test structure.

Reg SCI entities will use this framework to develop test outlines for their SCI testing.

The test framework will be posted on SIFMA’s website once complete.

This framework only applies to Reg SCI testing.

Reg SCI entities who also participate in the Industry Test will provide test guidance through the Summary of Components document on the SIFMA website.

Firms who are not designated testers with a given Reg SCI entity can:

- Continue to test with them though the SIFMA Industry Test
- Arrange to voluntarily carry out Reg SCI testing with them by prior arrangement

The SIFMA industry test will continue to provide connectivity testing with market infrastructure and service providers who are not in scope for Reg SCI.
Registration: Reg. SCI vs. SIFMA Test

- Reg SCI and the SIFMA Industry Test follow separate registration models.
- **Reg SCI test entities** designate mandated testers bilaterally and communicate directly with them. All notifications should have been sent by July.
- **SIFMA Industry Test Participants** chose which test entities they would like to connect with, and register with them through the SIFMA site.
  - Firms who are have been designated SCI testers by a given SCI entity do not need to also register for the SIFMA industry test with that entity.
  - Firms do not use the SIFMA registration system to register for SCI testing.
## Registration Guide - Reg. SCI vs. SIFMA Test

<table>
<thead>
<tr>
<th>Firm Situation</th>
<th>Registration Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Designated by a Reg SCI Entity to test with them</td>
<td>Work directly with that entity, do <strong>NOT</strong> register to test against them in SIFMA connectivity database</td>
</tr>
<tr>
<td>Want to test with DTCC family (NSCC, FICC, Omgeo), firm is not a DTCC designated Reg. SCI Tester</td>
<td>DTCC family is not participating in 2023 industry test due to Reg SCI conflicts; contact your relationship manager for alternative testing arrangements</td>
</tr>
<tr>
<td>Want to test with OCC, firm is not an OCC designated Reg. SCI Tester</td>
<td>Firms who were not designated to participate as RegSCI testers are encouraged to participate in the SIFMA Test in the same manner as OCC’s RegSCI designated participants. OCC encourages testing beyond the classic SIFMA Ping test and we would like to see firms send and receive actual data during the test. Connectivity testing is a required pre-requisite for participation in the Industry Test.</td>
</tr>
<tr>
<td>Want to test with any other Reg SCI entity, firm is not designated for Reg SCI Testing with them</td>
<td>Register to test with them in SIFMA industry test through SIFMA registration website</td>
</tr>
<tr>
<td>Want to test with a non Reg SCI entity (i.e. market data, FX, payments)</td>
<td>Register to test with them in SIFMA industry test through SIFMA registration website</td>
</tr>
</tbody>
</table>
Industry Testing Participants – Red are SCI Entities

**Equities**
- BIDS Trading
- Cboe BYX, BZX, EDGA & EDGX
- Dealerweb ATS
- IEX
- Long Term Stock Exchange
- NASDAQ
- Nasdaq BX
- Nasdaq PSX
- NYSE (CLASSIC)
- NYSE ARCA
- NYSE Chicago
- MIAx Pearl Equities
- NYSE MKT (AMEX)
- OTC Link ATS
- UBS ATS

**Options**
- BOX Options Exchange
- Chicago Board Options Exchange
- Cboe BZX Options
- CBOE C2 Options
- Cboe EDGX Options
- MIAx Option, Emerald & Pearl
- Montreal Exchange
- Nasdaq BX Options, GEMX, ISE, MRX,
  Options Market & PHLX
- NYSE AMEX
- NYSE/ARCA
- The Options Clearing Corporation
- CDCC
